

Get That New, Classic Granite Kitchen For the Holidays!

Host your next dinner party or holiday dinner in a kitchen with the most beautiful granite countertops you can imagine. Getting ready for the holidays in a gorgeous, durable, yet low-maintenance kitchen may seem like a wonderful dream, but it can be yours in less than a week!

The intrinsic versatility, strength and beauty of natural stones like granite, marble and travertine, make them an obvious choice for countertops and more. Introduce style and glamour into any room in your home with applications like vanities, floors, tub surrounds and showers. Designer favorites like classic white marble exudes luxury and indulgence, while richly patterned granite infuses the space with stately sophistication. Once installed, these time-honored styles will never need to be replaced. Dense and hard-wearing, stone surfaces maintain their appearance, performance and integrity for a lifetime.

Don't take any chances when choosing your stone. Look for a reputable company that features a local showroom where

you can actually see and feel the stone of your choice, so you get exactly what you want. A firm that does it all - importation, fabrication, and installation - avoids the middleman, keeps

prices down and simplifies the process. The ideal company should have an experienced in-house designer available to assist you in selecting colors and styles, and a tile department with thousands of samples to add just the right finishing touch.

Colonial Marble and Granite is the largest fabricator and installer of natural stone materials in the Northeast, with a focus on quality workmanship, unparalleled customer service and excellent prices. Visit any one of their impressive showrooms in major regional malls throughout PA and NJ, including Quakerbridge Mall & Montgomery Mall, or

their showroom in King of Prussia where you will find more than 4,500 slabs in over 450 colors. To find out how you can have a new granite kitchen for the holidays, or to get a free estimate, call (610) 994-2222, or visit www.colonialmarble.net. **DL**

No room in the home requires the unique blend of function and aesthetics demanded of the kitchen. But combining storage units, cooking surfaces, eating areas, and available space into a gorgeous, seamlessly integrated room needs the expertise of a professional design-build firm. Whether your kitchen is the place where you prepare meals, help the kids with homework, entertain guests, or just sit down with the family, get the most out of it for years to come by contacting a design-build firm for a professional remodeling.

Particularly in older kitchens, homeowners will notice details that just aren't quite right. These include a general

lack of usable space, insufficient countertop or storage areas, aging appliances, and dated cabinets or flooring. Before consulting with a contractor, tour your kitchen and think about any adjustments you would like made. Almost anything is possible, including wall removal to open up space, create additional food preparation areas, or make way for larger appliances. Enlarging windows or adding skylights is also a great way to make the room feel bigger.

To further develop a remodeling plan, take your lifestyle into account. Professional contractors know how to design for purpose, and will be able to create kitchens that satisfy all your needs. Like group cooking? Your contractor can create multiple food prep stations. Need internet access for homework or last-second recipe checking? Your contractor can fashion an integrated computer area. With the right contractor, even unique features like integrated spice planters, professional grade cooking ranges, handicap accessible areas, or functional islands are no problem.

To get the most out of your kitchen, contact Harth Builders of Spring House, the area's leading experts on all aspects of kitchen design and remodeling.
